Editor's *Note*

Issue 02 ships with a leaner roster. **MAIN** and **IBIT** have left the page; **ASX** (ASE Industrial) and **KOID** (KraneShares Humanoid Robotics & Physical AI) take their seats — extending the semiconductor & AI thesis already anchored by SMH.

Real return climbed from 14.08% to 19.72% over the cycle — the first time the portfolio crossed +\$175 in real net profit since Dec 9, 2025.
